Device Technologies, Inc.

Hector D. Petri - Founder

We honor and dedicate this new catalog to our Founder and Technical Director, Hector D. Petri, who had the vision and ingenuity to piece together unrelated technical disciplines to design and develop the unique Spring-Fast® Wire Protection Grommet Edging. Now celebrating its 25th Anniversary, Device Technologies, Inc., located in Southborough, Massachusetts, commenced production from a New England farmhouse basement in 1984, expanded to the barn a few years later, and is now in a Class-A, climate-controlled facility.

Our first solution was providing Digital Equipment Corporation (now HP) with a UL94 V-0 Spring-Fast Wire Protection Grommet Edging solution to cover sharp panel edges and protect wires and cables from abrasion for their premier VAX Mainframe computer. Other key innovations were installed-cost savings and the elimination of toxic adhesives... a precursor to today's essential green movement, and RoHS compliance!

From this humble beginning, the high-performance Spring-Fast® grommet product line has steadily improved, diversified and qualified for applications in dynamic and often hostile environments such as high-and-low temperature, high dielectric strength, salt spray, chemical immersion, shock, vibration, and abrasion.

Dedication and consistent conformance to customer needs has contributed to the growth of Device Technologies, Inc. It enhances our preferred vendor status to customers throughout the world, encompassing a broad segment of industries such as Aerospace, Computer Servers & Storage, Defense, Food Processing, Information Technology, Medical Equipment, Power Systems, Telecommunications and Transportation.

As our wire protection solutions became more and more effective, even greater demands were created to further develop new and additional materials. The result of Device Technologies' ingenuity is captured within the pages of this catalog. Our team of innovative engineers and critical partners have pioneered and grown the critical equipment protection solutions to a new level leading the industry with our enclosure seals, thermal management, EMI shielding, braided sleeving and more.

Device Technologies has been designing and manufacturing innovative solutions for the OEM industry and electromechanical product manufacturers since 1984, with design expertise that embodies more than 65 years of specialty fastener vision, experience and perspective.

We continue our Founder's legacy of proven problem solving techniques that help us think outside the box to renovate current products and innovate new products. Ours is a custom approach. We stay focused on your overall operating efficiency and your business model—not simply on the individual process problem in question. Product quality and speed of assembly, combined with long term durability, reliability and collaborative support, are embedded in our design solutions that protect your competitive edge.

The Result is product after product working systematically to cut effort, time, and expense from your manufacturing. Please visit our web site for new products and all the latest news about Device Technologies at

The information contained in this catalog is based on our experience to date and is believed to be reliable. It is intended as a guide for use by persons having technical skill at their discretion and risk. We do not guarantee favorable results or assume any liability in connection with its use. Dimensions contained herein are for reference purposes only. For specific dimensional requirements, consult the factory. This publication is not to be taken as license to operate under, or a recommendation to infringe upon any existing patents. This supersedes and voids all previous literature, etc. Device Technologies, Inc. expressly disclaims any and all express or implied warranties concerning its products including without limitation, warranty of fitness for a particular purpose and warranty of merchantability.

DTi Quality Statement

Device Technologies, Inc. considers quality to be consistent conformance to customer requirements.

- To meet or exceed our customers' requirements for the quality of the products and services we provide.
- To improve the effectiveness of our Quality Management System processes and advance our use of technology continuously so as to enable our customers to become more efficient and profitable.
- To provide our employees with all necessary information, training, tools and support so that they can achieve our quality objectives.
- To treat all customers, employees, suppliers and our community with honesty and integrity.
- To conform to the requirements of ISO 9001:2000 and AS 9100 B quality standards.

SpringFast®

Wire Protection Grommet Edging and Trim

Spring-Fast

Spring-Fast SL Series

Spring-Fast Mil-Spec

Trim-Fast™ S Series

Spring-Fast is the fastest, safest, most reliable way to protect wires, cables, and tubing from abrasion. It locks on with finger pressure in seconds, eliminating solvents, adhesives, ancillary materials and volatile organic compound (VOCs). Spring-Fast installs continuously and is very flexible for use on sharp corners and curved edges, such as flanged holes.

AP and BAP Series

BT Series

FM Series

BAP Series White

Features for all Spring-Fast:

- Coated with abrasion resistant nylon thermoplastic
- UL94 V-0 flammability rating
- RoHS and FAR 25.853 compliant
- Eliminates adhesives and ancillary
- UV Resistant
- For use on a wide range of panel thicknesses

Spring-Fast "T" Series:

- Lowest profile (size) grommet
- Operating temperature range: -40°F to 285°F (-40°C to 140°C)
- For straight edges and sharp inside and outside corners

Spring-Fast "BT" Series:

- Includes a flexible polymer cushion for added abrasion protection
- Operating temperature range: -40°F to 185°F (-40°C to 85°C)
- For straight edges and sharp inside and outside corners

Spring-Fast "AP" Series:

- Greater gripping strength for severe shock and vibration environments
- Operating temperature range: -40°F to 285°F (-40°C to 140°C)
- Multi-axis flexibility for straight edges, rounded inside and outside corners, and flanged holes

Spring-Fast "BAP" Series:

- Greater gripping strength for severe shock and vibration environments
- Includes a flexible polymer cushion for added abrasion protection
- Operating temperature range: -40°F to 185°F (-40°C to 85°C)
- Multi-axis flexibility for straight edges, rounded inside and outside corners, and flanged holes
- Optional white coating with gray cushion for aerospace applications

Spring-Fast "FM" Series:

- Same characteristics as "AP" Series plus flush mounting on one side for flat panel surfaces
- Operating temperature range: -40°F to 285°F (-40°C to 140°C)
- Multi-axis flexibility for rounded inside and outside corners

Spring-Fast "SLC" Series:

- Completely encapsulated in a flexible UL94 V-0 flame retardant polymer
- Operating temperature range: -40°F to 185°F (-40°C to 85°C)
- Added abrasion protection for wires and hands

Multi-Axis Flexibility:

SpringFast® SL AERO Series

Wire Protection Grommet Edging

Spring-Fast SL AERO Series is the fastest, safest, most reliable way to protect wires, cables, and tubing from abrasion. It locks on with finger pressure in seconds, eliminating solvents, adhesives, ancillary materials, and volatile organic compound (VOCs). SL AERO installs continuously and is very flexible for use on curved edges, such as flanged holes. The SL AERO Series is fully encapsulated in a flexible polymer for added abrasion protection for use on high performance applications including aircraft structures and interiors, advanced avionics systems, military vehicles, NASCAR, super computers, medical equipment, and rail transit.

Qualifications:

- Flammability per FAR 25.853 and ASTM E 162 (UL94 V-0)
- Smoke Density per ASTM E 662
- Random Vibration per MIL-STD-102, Method 214A, Table 1
- Mechanical Shock per MIL-STD-810C, Method 516.2
- Salt Spray (Corrosion) per MIL-STD-202F, Method 101D
- Humidity per MIL-STD-810F, Method 507.4
- Immersion per NASM22529, Paragraph 4.2.5
- Dielectric Withstanding Voltage per NASM22529, Paragraph 4.2.5
- Low Temperature per MIL-STD-810E, Method 502.3
- Temperature Cycling per MIL-STD-202G, Method 107G, Table 107-1

Features and Benefits:

- RoHS compliant
- DFARS Compliant
- Multi axis flexibility for straight edges, flanged holes, and inside and outside corners
- Indoor and outdoor use
- Operating temperature range: -67°F to 203°F (-55°C to 95°C)
- Continuous edge protection
- Excellent gripping strength
- Excellent resistance to abrasion, water absorption, and low and high temperatures
- Fast assembly without the use of adhesives, rivets, or screws

Applications:

- Aerospace
- Military
- Automotive
- Telecommunication
- Medical
- General Industrial
- Railway

A better, cleaner, and faster way to cover sharp panel edges and protect your equipment from failure due to wire, cable, or hose abrasion and create a finished edge appearance. Trim-Fast is offered in enlarged sizes for thicker panel applications up to 3/4" (19mm).

Trim-Fast Edge Trim is available in a variety of materials, which include a flexible steel or stainless steel substrate covered with Silicone, EPDM, or PVC allowing for fast and easy assembly.

Features and Benefits:

- Excellent grip strength
- Excellent resistance to abrasion
- Low and high temperature use
- Indoor and outdoor use
- Fast assembly without the use of adhesives, rivets, or screws
- Multi-axis flexibility for straight edges, or small radii
- Sheet thickness ranges from 0.039" (1mm) up to 3/4" (19mm)

Applications:

- Automotive
- Railway
- Aerospace
- Food service (FDA white)
- Telecommunications
- Construction
- Marine
- General industrial

"S" Silicone Series

- FDA approved (White Silicone Material)
- ASTM E 662 (Toxicity)
- ASTM C 542 & ASTM C 1166 (Flame Propagation)

"S" EPDM Series

- FMVSS 302 (Flammability of Interior Materials)
- SAE J1885 (Interior Weatherometer)
- SAE J1960 (Exterior Weatherometer)
- SAE 200 M8BA 708 B13 21-6 (Low Temperature Flexibility)

"S" PVC Series

- Greater flexibility for small corner radii
- Smaller profile

Additional and custom sizes available, please consult factory or representative for details or evaluation samples

DTi offers a variety of tools to cut, measure, and apply Spring-Fast grommet and Trim-Fast edge trim.

Full Bypass Shears - Part Number 830PS

- Quickly cuts Spring-Fast grommet and Trim-Fast edge trim assuring a clean, burr-free cut
- Prevents distortion of adjacent castles

Roll-Fast™ - Part Number 840R

- Quickly installs Spring-Fast grommet
- 1/2" (12.7mm) outside groove diameter

Cutter-Cart® - Part Number 850CS

- Two fixed and two swivel casters with brakes
- Mounting shaft to install up to (16) 25' rolls or (6) 100' reels
- Cutting bar with 830PS shears
- Cut to length scale
- Lower tray for additional inventory

Spring-Fast Cut to Length Scale - Part Number 860GSB

- Adhesive backed for applying to work bench
- Measures in inches and castles
- 24 inches long (154 castles)

Spring-Fast Sheet Thickness Gauge - Part Number 880-G

- Go/No Go Gauge for all Spring-Fast sizes
- For sheet thicknesses from 0.020" to 0.260" (0.5mm - 6.6mm)
- Made from stainless steel

Seal-Fast™

High Performance Enclosures and Door Seals

A better, cleaner, and faster way to protect your equipment from environmental conditions; dust, low and high temperatures, and moisture.

The Seal-Fast Edge Seal installs without the use of adhesives, is very flexible, and is available in a variety of materials which include a flexible steel or stainless steel substrate with a Silicone, EPDM, or PVC gasket allowing for fast assembly.

Features and Benefits:

- Fast assembly without the use of adhesives, rivets, or screws
- Excellent grip strength
- Multi-axis flexibility for small inside and outside radius corners
- Excellent resistance to abrasion, water absorption, and low and high temperatures
- Indoor or outdoor use

Applications:

- Automotive
- Railway
- Aerospace
- Food service (FDA white)
- Telecommunication
- Construction, mining, and forestry
- General industrial

“D” Silicone Series

- FDA approved (White Silicone Material)
- ASTM E 662 (Toxicity)
- ASTM C 542 & ASTM C 1166 (Flame Propagation)

“D” EPDM Series

- FMVSS 302 (Flammability of Interior Materials)
- SAE J1885 (Interior Weatherometer)
- SAE J1960 (Exterior Weatherometer)
- SAE 200 M8BA 708 B13 21-6 (Low Temperature Flexibility)

“D” PVC/EPDM Series

- Greater flexibility for small corner radii
- Smaller profile

Additional and custom sizes & profiles available, please consult factory or representative for details or evaluation samples

Plate-Seal is the fastest, safest, and most reliable way to protect critical equipment in places where wire, cable, air hoses, liquid hoses, and fuel and oil lines pass through openings and are in contact with sharp panel surfaces. The flame resistant Plate-Seal protects against chafing and abrasion, and seals out heat, fumes, dust, moisture, and other contaminants. The rubber grommet portion grips tightly to create an environmental seal that provides a clean and organized appearance. Plate-Seal mounts to a panel using rivets or screws and is offered in stock sizes which can be customized to fit many applications.

Features and Benefits:

- Fast and easy to install with use of screw, rivets, or optional PSA
- Encapsulated with NBR to keep unwanted contaminants from entering through hole or cutout area
- Protects wire, cables, and hoses from chafing and abrasion
- Enhances appearance
- No need for extended cure time adhesives or other auxiliary material
- Accepts a wide range of cable diameters
- UV and ozone resistant
- Excellent resistance to abrasion, compression set, flex cracking, impact, tear, and vibration

Applications:

- Aircraft galley equipment
- Avionics
- Bulkhead
- Automotive
- Railway
- Telecommunications
- Marine
- Trailers and motor homes
- General industrial

Performance:

- Resistant to fluids (solvents, fuels, and oils) per MIL-R-3065D, MIL-R-6855, and MIL-R-2765
- Continuous operating temperature: -50°F to 320°F (-45°C to 160°C)
- Intermittent operating temperature: -70°F to 400°F (-57°C to 204°C)
- Durometer range: 20 to 95 Shore A
- Elongation range: 350% to 650%

Product Sizes per Product Type:

- For hole diameters and cutouts from 1" to 5" (25.4mm to 127mm)
- For standard cable bundles or hose diameters from 0.25" to 1.5" (6.4mm to 38.1mm)
- Choose seal inside diameter that is 1/16" to 1/8" (1.59mm to 3.18mm) smaller than bundle/hose diameter.
- Largest bundle/hose diameter should be at least 3/8" (9.53mm) less than seal outside diameter.
- Custom solutions per application

Cutting Saw - Part Number 910JS

- Thin blade cuts all seal material including metal
- Ergonomic handle
- Highly adjustable for easy blade changes

Roll-Fast™ - Part Number 840R

- Quickly installs seal and trim materials
- 1/2" (12.7mm) outside groove diameter for smaller size profiles

Long-Nose Full Bypass Shears - Part Number 830LN

- Quickly cuts seal material for rough cut lengths
- Larger profiles may require more than one cut
- Easily cuts through metal carrier

Other installation and tool options:

- Use band saw for cutting to length or finishing edges
- Use larger, flat roller for profiles greater than 1/2" (12.7mm) wide
- Use rubber mallet for installing tighter fitting profiles

DTi-Tis™
Specialty Cable Ties

The Push-Mount Cable Tie System is designed for fast and easy assembly with no need for mechanical fastener reducing installation time and costs. It quickly secures and positions wire bundles, cables, and hoses, to panels. Extra stability is created from the push mount head design, which is contained, keeping cable ties from sliding during installation and application. The cable tie has a low profile height compared to standard designs increasing safety and eliminating snags, and cuts and abrasions to wires, cables, and hoses. The cable tie can be removed and replaced fast and easily by cutting the top crossbar.

Features and Benefits:

- Reduction of installation time and its associated costs
- Low-profile, tamper-proof cable tie
- Rated for indoor and outdoor use
- Flame retardant per UL94 V-2
- RoHS compliant
- Tensile strength: 50lb (222N)
- Operating temperature range: -40°F to 185°F (-40°C to 85°C)

Applications:

- Cell towers
- Aerial support
- Telecommunications
- Transportation

Part Number: 0501-01

Tolerances: .xxx = ±0.005, .xx = ±0.015

Packaging: Sealed poly bag in quantities of 100, 1000, or customer specified up to 1000 pieces

DTi-Ti Push-Mount Cable Ties

Standard

The Pull-Mount cable tie installs from the bottom of the panel. The high strength button head snaps fast and easily into a 3/8" (9.5 mm) diameter hole inside a panel with a thickness range from 0.045" (1.1 mm) to 0.100" (2.5 mm). The cable tie loops around the cables to secure the bundle. The excess cable tie is pushed through the releasable latch mechanism and the retaining tabs to create a secure fit, eliminating the need to cut off excess.

Features and Benefits:

- Fast and easy assembly
- UV resistant for indoor and outdoor use
- Flame retardant per UL94-V2
- RoHS Compliant
- Operating temperature range: -40°F to 221°F (-40°C to 105°C)
- Application hole diameter: 0.375" (9.5mm)
- Application panel range: 0.045" to 0.100" (1.1mm to 2.5mm)
- Maximum bundle diameter: 1.75" (4.44cm)

Applications:

- Aircraft Seating
- Appliances
- Cell Towers
- Aerial Support
- Telecommunications
- Transportation
- General Industrial

Part Number: 0685-05000-070

Packaging: Sealed poly bag in quantities of 100, 1000, or customer specified up to 1000 pieces

DTI-Ti's are moisturized to maintain optimal performance levels. Cable ties should be stored in cool dry areas, out of direct sunlight, and sealed in the original packaging.

Color Cable Ties

The Color Cable Tie is ideal for color coding, identification, packaging continuity, bundling, and aesthetics applications. They assemble fast and easy and are Mil Spec MS-3367 approved.

Features and Benefits:

- Fast and easy assembly
- Indoor and outdoor use
- Flame retardant per UL92 V-2
- RoHS compliant
- Operating temperature range: -40°F to 185°F (-40°C to 85°C)
- Mil-Spec approved MS3367

Applications:

- Color coding
- Identification
- Packaging continuity
- Bundling aesthetics
- General industrial

Low Profile Cable Ties

The tamper-proof Low Profile Cable Tie has a low profile head preventing snagging when the cable is trimmed and pulled through a hole. The low profile design eliminates sharp edges, common in most cable ties.

Features and Benefits:

- Fast and easy assembly
- Indoor and outdoor use
- UV (ultraviolet) light resistance
- Flame retardant per UL92 V-2
- RoHS compliant
- Operating temperature range: -40°F to 185°F (-40°F to 85°F)
- Mil Spec approved MS3367
- Color: Black or natural

Applications:

- Cell towers
- Aerial support
- Telecommunications
- Transportation

DTI-Ti's are moisturized to maintain optimal performance levels. Cable ties should be stored in cool dry areas, out of direct sunlight, and sealed in the original packaging.

Stainless Steel Cable Ties

The stainless steel cable ties are extra strong and durable, for bundling and fastening applications in severe environmental conditions. Great for industrial projects and network bundling of data and power cables.

Features and Benefits:

- Ball and locking mechanism provides ease of insertion and high tensile strength
- Excellent UV and chemical resistance
- Non-flammable
- Indoor and outdoor use
- Loop tensile strength: 100 lb. and 250 lb.
- Type 304 Stainless Steel
- Color: Uncoated or coated black
- Operating temperature range:
Uncoated:
-112°F to 900°F (-80°C to 482°C)
Coated Black:
-40°F to 302°F (-40°C to 150°C)

Applications:

- Construction
- Landscaping
- Oil rigs
- Chemical plants
- Solar
- Ships/Submarines
- Cell towers
- Aerial support
- Telecommunications
- Transportation

Tefzel Cable Ties

The Tefzel Cable Tie is resistant to radiation, flames, UV (ultraviolet) light, chemicals, and high temperatures with a maximum use temperature of 302°F (150°C).

*Tefzel is a trademark of DuPont Corporation

Features and Benefits:

- Fast and easy assembly
- Indoor and outdoor use
- UV (ultraviolet) light resistance
- Flame retardant per UL94 V-0
- RoHS compliant
- Operating temperature range:
-40°F to 302°F (-40°C to 150°C)
- Chemical resistant
- Radiation resistant
- Color: Teal

Applications:

- Cell towers
- Aerial support
- Telecommunications
- Transportation
- General industrial

Do your fiber optics need rounding up? Sharp corners may be fun on the racetrack, but they can wreak havoc on your fiber optic cables, causing lost data and reduced efficiency.

Fast-Drop Fiber Bend Radius Control Modules provide the BICSI recommended minimum bend radius for fiber optic cables, assuring consistent data transmission. The Fast-Drop is molded of UL94 V-0 flame retardant, impact resistant polycarbonate and is rigid enough to withstand large bundle loads. NEBS compliant.

The universal Fast-Drop quickly snaps on to any panel edge up to 0.104" (2.7mm), retained by a RoHS compliant plated steel slip. It also may be screw or tab mounted to the cabinet to make service loops. Cables are easily contained with the use of our hook and loop strap. Available from stock in three containment widths: 1" (2.5cm), 1.75" (4.4cm), and 3" (7.6cm), in black or beige. Slotted side design allows for easy screw and/or stacking attachment

Service Loop/Take-up Reel

Patch Panel Egress

Features and Benefits:

- Fast assembly without adhesives
- Contain and manage cables
- Protects cables from kinks
- Service loops mounting
- Fits within standard unit racks
- Snaps into place
- Impact resistant
- Hook and loop strap containment option
- Flame retardant per UL94 V-0
- RoHS compliant
- Three sizes, two colors
- Available from stock

Applications:

- FTTH or FTTP cabling
- Patch panels, control boxes, racks, cabinets, and enclosures
- Data centers/central offices
- Telecom switches and base stations
- Medical, x-ray, and imaging equipment
- Industrial equipment

Uses:

- Fiber and copper cables
- Electrical wiring
- Pneumatic and fluid tubing
- Hydraulic hoses

For Hook and Loop Straps add -HL to part number suffix (i.e. 321-1A-HL)

*3.00" Fast-Drop has no screw mounting slots

Protect-Fast™ AERO and TELCOM

Braided Sleeving

Protect-Fast Braided Sleeving is an efficient solution allowing for easy installation of wires or bundles of cable. It is a tough, lightweight method used to contain and protect cable assemblies, hoses and wire harnesses from abrasion and cutting.

- The PFR material is MIL-202 and FAR25 approved, gasoline resistant, and has a temperature rating from -75°C to 125°C (-103°F to 257°F)
- The ECM material is FAR25 approved with low outgassing, resistant to strong acids and gasoline, and has a temperature rating from -75°C to 150°C (-103°F to 302°F)
- The PFW material is UL94 V-0 and UL VW-1 approved, solvent resistant, and has a temperature rating from -75°C to 125°C (-103°F to 257°F)
- The PSM material is FAR 25 approved, chemical resistant, and has a temperature rating from -70°C to 200°C (-94°F to 392°F)

Protect-Fast™ Industrial

Braided Expander & Shield Expander

DTi's Protect-Fast Expander and Shield Expander products provide excellent flexibility and abrasion resistance for wire and cable organizing within a variety of applications including telecommunications, automotive, electronics, and data center design. It's open woven structure enables the Expander to be enlarged up to 3 times the initial diameter. The Shield Expander has the same mechanical properties as the Expander but also provides excellent shielding effectiveness because of it's woven fibers and conductive copper wire design.

Features and Benefits:

- Superior flexibility
- Excellent abrasion resistance
- Colors: Black, White, Blue, Red, and Black and White Stripe
- Flammability: UL94-V0
- Excellent surface resistivity: Shield Expander only

Applications:

- Telecommunication
- Transportation
- Theaters
- Data Centers

Expander and Shield Expander Specifications:

Content	Expander	Shield Expander

The Hook and Loop cable management strap is a self gripping fastener that offers a neat and secure way to bundle cables and cords. The Hook and Loop Strap wraps around cables and latches on its opposing side for secure containment. The Hook and Loop Strap is made from UL94 flammability rated material.

Features and Benefits:

- RoHS compliant
- Flame retardant per UL94 V-2
- Burn resistant per MVSS 302
- Fire and smoke resistant per FAR 25.853F, part (a), (l), (i) vertical 60 second burn and (ii) 12 second burn
- Acceptance per NEC 300-22, paragraph (c) and (d)
- Load capacity: 18lbs
- Contact area: 0.73in² (4.84cm²)

Applications:

- Automotive
- Cable management
- Fiber management
- Data center installations
- Gaming equipment
- Aircraft
- Air handling equipment
- Telecommunications
- Medical equipment
- Appliances

Part Number	W Width inches (mm)	T Thickness inches (mm)	L Length inches (mm)	Pieces per reel

Packaging: Perforated lengths on reels of 600 ft. Custom sizes available
Material: Polypropylene hook laminated to a nylon loop
Color: Black

DTi offers a variety of cable tie tools for tensioning, removal, or wire stripping. The tension and cutoff tools quickly apply tension and cut off excess cable tie material without leaving sharp edges while also eliminate snags, cuts, and abrasions on cables.

The cable tie removal tool provides maximize natural hand contraction motion, assisted with an auto return spring. Works with all plastic cable tie strap widths or lacing cords and 12 to 22 solid and stranded gauge wire

Cable Tie Tension Tools

8100TT: The most cost effective. Quickly applies tension and cuts excess cable tie material with a twist of the tool.

8200TT: Automatically cuts off excess cable tie material or selected tension setting. Produces consistent tension from tie to tie with one easy pull of the trigger.

8300TT: Designed for larger cable ties with tensile strength greater than 50lbs and cuts off cable tie material with one squeeze of the handle.

8900TT: Stainless steel tool quickly applies tension and cuts off excess cable tie material automatically when setting is achieved with no sharp metal protrusions.

Cable Tie Removal Tools

8100RT: The cable tie removal tool provides maximize natural hand contraction motion, assisted with an auto return spring. Features a safety tip to remove cable tie without cutting into bundled wires.

8200RT: Includes the same features as the 8100RT with the added ability to strip 12-22 gauge wire.

EMI/RFI Shielding

G Series Fabric Over Foam

DTi offers the G Series Conductive Fabric Over Foam Gaskets for a wide variety of EMI shielding applications. The G Series consists of a conductive fabric on a highly compressed polyurethane foam core with a conductive adhesive tape. Excellent flexibility with superior adhesive strength guarantee a precise fit on uneven surfaces.

DTi's G Series also offers a gold fabric option, providing increased conductivity and minimum oxidation over the nickel or silver fabrics.

Backplane I/O

Features and Benefits:

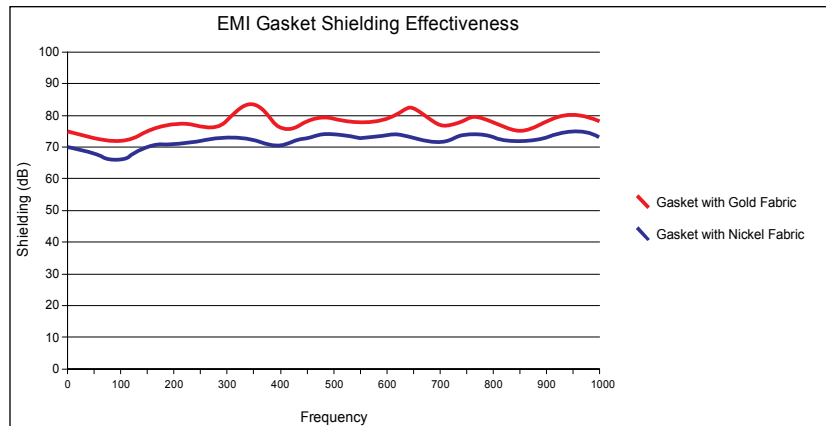

- UL94 V-0 flammability rating
- RoHS compliant
- Excellent flexibility
- Superior adhesive tape
- Easy to cut and install
- Available in customer specified width & height
- Std. length - 1 meter or cut to length

Applications:

- Mobile phones
- Backplanes
- Navigation systems
- Entertainment systems
- Satellite radio receivers
- Telecommunication systems
- I/O panel connector

EMI/RFI Shielding

FS Series Conductive Cushion Gasket

Conductive cushion gaskets offer an innovative approach to traditional shielding and grounding by providing X, Y and Z axis conductivity which enhances the shielding effectiveness. This is required to meet the increasing microprocessor speeds of today's computer, telecommunications and aerospace equipment.

DTi's FS Series Conductive Cushion Gaskets have a basic construction of Ni-Cu plated polyolefin (F01) foam, laminated with conductive fabric. Available in roll, sheet, or custom die cut forms.

Mobile phone grounding/shock pad

Die cut solution on Roll Caddy

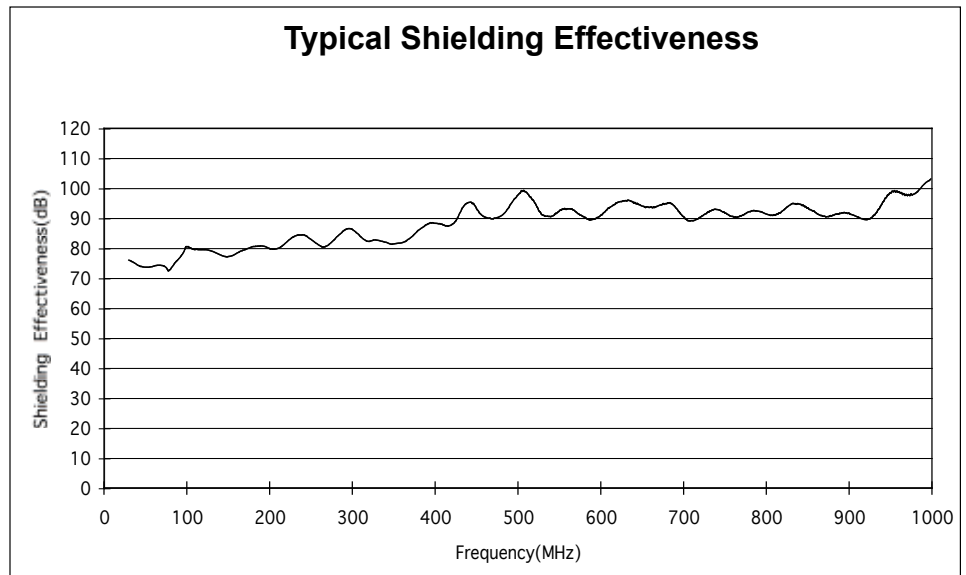

Raw sheet stock (Rolls not pictured)

Features and Benefits:

- Superior shielding effectiveness combined with Shock Absorption
- Excellent conductivity-deflection rate
- Various thicknesses available
- Easy installation with or without conductive PSA
- Wide temperature capability -30°C to 90°C

Applications:

- Wireless device displays and speaker cutouts
- Grounding between PCB and chassis
- PCI bracket
- Medical equipment
- Telecommunication equipment
- Automotive
- Appliances
- Computer and Servers

RFI Shielding - RF Absorber Materials

FA Series

DTi offers the FA Series RF Absorber Materials for the suppression of electromagnetic waves in electronic devices. The FA Series covers a wide frequency range (10MHz ~ 18GHz) to provide excellent suppression of high frequency radiated noise, conduction noise, and electrical surge. The FA Series RF Absorber Material accomplishes this by absorbing electromagnetic waves into heat and suppresses reflected waves. The material is thin, lightweight, and flexible and can be applied to a variety of applications with the adhesive tape. The FA Series is available in sheet or roll form but can be die cut to custom shapes and sizes.

Sheet stock

Thermal Interface Materials

DTIM Series

The performance of electronic devices is constantly improving but with this evolution comes greater power consumption and heat generation. If heat cannot escape efficiently, the performance of the device suffers. To transfer heat effectively, the introduction of DTIM Thermal Interface Materials becomes necessary. DTIM material properties combine high thermal conductivity, flame-retardant properties for heat resistance, and electrical insulation. These requirements are becoming very important qualifications in the electronics industry.

Silicone based thermal interface materials contain a high ratio of thermally conductive ceramic fillers. They exhibit outstanding thermal conductivity because they conform well in the gap between the heat generating device and the heat-sink.

Features and Benefits:

- UL94 V-0 flammability rated
- Highly compressible
- Low thermal impedance
- Inherently sticky, but optional adhesive tape available
- Stable from -30°C to 200°C

Applications:

- Micro Processors
- Memory Chips
- RDRAM Modules
- High Speed Storage Devices
- Telecommunications Hardware
- Automotive Engine Control Units
- Cooling Components to the chassis or frame

How DTIM thermal interface materials work:

DTIM G0, G1, & G2 Gels and Sheet:

Without DTIM material contact between two surfaces can contain up to 90 percent air filled voids which resists heat transfer.

Without DTIM material

Adding DTIM G0, G1, or G2 material closes air filled voids and allows for greater heat transfer.

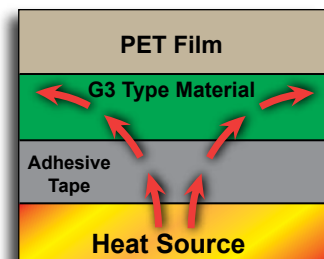

With DTIM material

DTIM G3 Sheet:

DTIM G3 material intercepts vertical heat transfer and spreads heat horizontally.

With DTIM G3 material

DTIM Thermal Interface Material Specifications and Ordering Options

G0, G1, & G2

Characteristic	DTIM G0 Type	DTIM G1 Type	DTIM G2 Type
Type	Sheet	Gel	
Thickness (mm)	0.1 ~ 0.35	0.5 ~ 10.0	0.2 ~ 10.0
Durometer	60 (Shore A)	< 40 (Shore OO)	60 (Shore OO)
Color	White	Gray	
Volume Resistivity ($\Omega \cdot \text{cm}$)	1.0×10^{11}		
Voltage Breakdown (kV)	5.1	> 6	5.1
Thermal Conductivity (W/mk)	Min. 4.0	Min. 2.0	Min. 1.5
Temperature Range	-30°C ~ 200°C (-22°F ~ 392°F)		
Flammability Rating	UL94 V-0		

G3

Characteristic	DTIM G3 Type
Type	In-Plane Sheet
Standard Sizes	Roll (500mm x 25m)
	Sheet (210mm x 300mm)
Thickness (mm)	0.13 ± 0.02
	0.16 ± 0.02
	0.18 ± 0.03
Color	Black
Vertical Thermal Conductivity (W/mk)	Max 0.5
Horizontal Thermal Conductivity (W/mk)	Max 8.0
Resistivity ($\Omega \cdot \text{cm}$)	Non-Conductive
Service Temperature	-10°C ~ 120°C (14°F ~ 248°F)
Flammability Rating	UL94 V-0

EMI/RFI Shielding

ST & DT Series Conductive Fabric Tapes

DTi's Conductive Fabric Tapes are composed of a conductive substrate and adhesive. They offer a thin, lightweight, and flexible shielding design. The ST and DT series' pressure sensitive adhesives (PSA) are produced using highly conductive adhesives either on their own or combined with conductive textiles. The conductive PSA offers superior mechanical, electrical and adhesive properties. ST and DT Fabric Tapes are ideal for sealing seals and wrapping cables for shielding and grounding applications.

Features and Benefits:

- Excellent shielding effectiveness
- Highly flexible
- Lengths of 25 or 50 meters
- Optional flame retardant layer
- Can be die cut to custom shapes

Applications:

- Computer
- Telecommunications
- Military
- General electronics
- Medical equipment
- Automotive

Typical Shielding Effectiveness of DT Series

Typical Shielding Effectiveness of ST Series:

EMI/RFI Shielding

SMT & DMT Series Metal Foil Adhesive Tapes

DTi offers an extremely broad range of metal foil based conductive adhesive tapes. The SMT and DMT Series Metal Foil Tapes are produced using highly conductive adhesives either on their own or combined with a variety of metal foils. The SMT and DMT Series adhesive tapes have superior mechanical, electrical, and adhesive properties. These characteristics provide a thin, lightweight, and flexible shielding design.

Features and Benefits:

- Highly flexible
- High conductivity
- Excellent shielding effectiveness
- Copper or aluminum foils
- Corrosion resistant
- Single or double sided construction

Applications:

- Wire harnesses
- Grounding
- Sealing seams

Application Techniques:

- Bonding surfaces must be clean and dry. Isopropyl alcohol is recommended as a cleaning agent.
- Bond strength can be increased by applying ST Series PSA firmly with a roller or finger pressure to exclude air entrapment.
- Adhesion is optimized when the substrates are flat or conformable.
- Adhesion increases after application, up to 24 hours later, due to increased wetting by the tape.
- Most metal surfaces give enhanced electrical performance with ST Series PSA by lightly roughing the surface.
- ST Series PSA should be applied between 60°F - 100°F (15°C - 38°C). Tape application below 50°F (10°C) is not recommended.
- Warming the substrates to 100°F (38°C) facilitates adhesion. Once properly applied, low temperature holding power is generally satisfactory.

EMI/RFI Shielding

S Series Stamped Finger Gaskets

S Series Stamped Finger Gaskets combine high levels of EMI effectiveness with finger contact and low closure force properties. **Beryllium Copper (BeCu C17200 alloy)** offers high performance EMI shielding qualities over a broad frequency range. **S Series Gaskets** can be plated with tin or gold. Strips can be soft soldered or resistance welded, edge or slot mounted, use a track and rivet system, or come with pressure sensitive adhesive.

Features and Benefits:

- High tensile strength
- Excellent anti-corrosion properties
- Superb electrical conductivity
- Shielding Effectiveness:
Min. 90dB from 1MHz to 1GHz
- Contact Resistance: Max. 0.05Ω

Applications:

- Chassis covers
- Front panels
- Back planes
- Plug-in units

Physical Properties	S Series BeCu
Tensile Strength	180 ksi Min.
Yield Strength	155 ksi Min.
Hardness	Rockwell C36 ~ C43
Temperature Range	-30°C ~ 105°C
Elongation in 2 inches	48%

Chemical Composition	
Be	1.8 ~ 2.0%
Co + Ni	> 0.2%
Co + Ni + Fe	≤ 0.6%
Pb	≤ 0.02%
Cu	Balance

Finish Plating	Recommended Mating and Mounting Surface
Cu	Brass, Cu, Ni-Cu Alloy, Monel, Stainless Steel, Ag
Ni	Brass, Carbon Steel, Cu, Fe, Stainless Steel, Sn
Sn	Al, Al Alloy, Be, Carbon Steel, Ni, Sn, Zn

For three decades, Device Technologies has been powder coating linear (reel-to-reel) substrates for its own Spring-Fast® line of wire protection grommet edging. The powder coatings work so well for us, we've decided to offer linear powder coating services to other industrial users.

Our powder coating method is a unique, reel-to-reel process. It applies thermoplastic resins such as nylon and polyethylene, or thermoset resins such as polyester and epoxy to linear metallic substrates such as wire, cable, stampings, or steel strip. The coating can be applied to the entire surface, or selectively to part of the surface creating functional and/or decorative finishes.

Capabilities and Features of Our Powder Coating Service

The near 100% transfer efficiency rate of Device Technologies' process delivers a fast and efficient application of a smooth, protective coating to a variety of wire, cable, stampings and metal strip. Functional finishes include end products that require durable surface protection for electrical insulation or corrosion resistance. Decorative finishes are also durable and can be used to create virtually any color as well as special effects.

Selectively Coated

- Thermoset and thermoplastic resins
- Specialty electrical insulation and corrosion resistant coatings
- Decorative coatings
- Flexible coatings
- Full and selective coating
- Depositions from light dusting to heavier builds

We at Device Technologies collaborate with our customers to develop new products and provide value engineering solutions from concept and design through manufacturing, verification, and validation in accordance to our AS and ISO quality process standards. Our solutions are developed to perform and provide a particular function or set of functions effectively and reliably and to be manufactured economically for our customers. Our collaborative solutions include, but are not limited to, wire abrasion protection, cable management, enclosure sealing and EMI / RFI shielding.
